A dissemination of this e-learning training was conducted on 30th August 2023. This dissemination event was hosted by Universiti Teknologi PETRONAS under our International Community of Practice (CoP). The sharing session was done as an international collaboration between Ms. Azila Ayub and Ms. Norazlina Abdul Nasir from UniKL MIMET and Dr. Thoa Le Thi Kim from HCMUNRE as shown in the poster above. The recording of the dissemination can be accessed through [this link](#).

3. What types of platform can be used for sharing videos?

Hosting your own Website

- Uploading a video to a web server of the website
- There will be a storage limit depending on the hosting plan.
- Video files are large, it can be easy to exceed that limit.
- The limit of server bandwidth is another problem. If many people view the video simultaneously, it can easily go over the limits of the web server

Using a Sharing Platform

- Uploading a video to a sharing platform
- Sharing platforms won't restrict the storage.
- They offer protection from piracy and the viewership can grow due to the traffic that comes to their site.
- Users can embed or link the video on their site after.

A feedback form was prepared to measure the effectiveness of this sharing session among the registered participants. Below is the example of the feedback form created by UTP.

1. How did the COP session compare to your expectations? Please rate your experience using a star-based system, where the number of stars corresponds to how much your expectations were exceeded. A higher star rating indicates that your expectations were exceeded to a greater extent. *

Here are some of the feedbacks recorded from the participants for questions 4, 5 and 6.

W
Any comments on the contents of the COP session in terms of the quality of the contents, as well as the presentation? <input type="text"/>
Good quality
Excellent
Very good sharing
Very prepared
good session, well prepared and good demonstration of the application used in the research.
Presenters were rather well prepared

Z
What is one useful piece of knowledge or tool that you have gained from the session? Are you going to use the knowledge or tool yourself? <input type="text"/>
Online tool for teaching. Yes, will use them in future
HP5
One of the speakers mentioned a technology that has proven highly beneficial in encouraging students to become more actively engaged.
Lumi education tool in creating interactive and engaging content
Presenter experience, tips and overall advantage of using the technology i.e. software etc.
Lumi. Yes will use it.

Please provide constructive criticism, expressions of gratitude or suggestions for improvement	Feedback - Please provide constructive criticism, expressions of gratitude or suggestions for improvement
Include the real case scenario can enhance the training	
Knowledgeable trainer	
Given the speaker's enthusiastic approach, I would recommend conducting the sharing session online but in a physical location. My unreliable internet connection and work commitments sometimes hinder my ability to fully participate in these valuable discussions.	
Looking forward for more	
Informative and good sharing of skills and application across different institutions	
Good sharing.	

Overall, the dissemination of this e-learning training is successful although it was conducted online. We plan to conduct a physical dissemination with other lecturers in UTP in the future related to e-learning and teaching improvement.
