**MARE -Marine Coastal and Delta
Sustainability for Southeast Asia**

Meeting of MARE Vietnam partners and some stakeholders discussing SCP

A meeting was organised on July 26, 2022 between the Vietnamese partners of the Marine Coastal and Delta Sustainability for Southeast Asia (MARE) Project to discuss linking MARE activities and resources with relevant academic & non-academic organisations involving employers. The meeting was organized in the MCD office in Hanoi, with the participants in-person from MCD, HCMUNRE, CTU, VNIO and virtual participation of VMU representative. The meeting was also attended by guest participants from the University of Toronto (Canada) and VISI.

The Meeting focused on two main parts including (1) update of MARE Vietnam partners' activities and progress in development and uses of teaching and learning materials; and (2) kick-off planning for stakeholder collaboration platform which should link MARE activities and resources with relevant academic & non-academic organisations and CDM employers. The partners also discussed some ideas for a roadmap for SCP such as making use of workshops, seminars organized by the partners as the forum for sharing MARE project to stakeholders, uploading MARE project activities and TLM to a focal point website for others to check-in and use.
