# Report on Building Platforms for Stakeholder Collaborations

**HCMC University of Natural resources and Environment**

Co-funded by the  
Erasmus+ Programme  
of the European Union

Marine Coastal and  
Delta Sustainability  
for Southeast Asia

# 1. Introduction to the stakeholder platform

- HCMUNRE has developed stakeholder platform for discussion and forum between the project partners and project stakeholders (employers, students, staff, representatives from industry, academia and civil society organisations).
- In order to promote stakeholder-academic collaboration over MARE topics and to ensure its sustainability, the following organisational forms (sectoral collaboration platforms) have been established.
- The stakeholder platform is restricted to invitation only. it can be the face to face or virtual meeting.

Delta Sustainability  
for Southeast Asia

## 2. Three Platforms

The platforms took different organisational forms following the specific geographical contexts and existing stakeholder configurations and preferences.

What their share in the common is the commitment to jointly explore options for regional sustainability through mutually beneficial cooperation arrangements.

### 3. DNeT Forum <https://marehcm.biendaohcm.com/?p=7376>

#### Introduction to DNeT Forum

Along with the economic development of the country, the demand for high-quality human resources always requires educational institutions to constantly improve the quality of teaching to meet the needs of employers.

However, according to the regulations of the Ministry of Education and Training, new subjects must not exceed 30% of the total number of credits in the training program and should be reviewed and updated every 2 years.

In order to keep pace with economic development and the needs of the labour market, in addition to the development of new subjects, which are limited to no more than 30% of the total number of credits in the training program, current subject content should be updated regularly to be able to meet the evolving needs of the labour market. This forum is born with the purpose of connecting employers, scientists and schools to discuss and propose suitable content to include in university training programs.

## 4. DAEP Forum <https://marehcm.biendaohcm.com/?p=7918>

### Objectives

The Stakeholder Platform will discuss the implementation of digital education – in terms of both policy and practice – at the national and regional levels.

It will provide a platform for reflection on the first year of implementation of the e-learning system in the MARE project Plan, promote further engagement among the digital education community and support outreach to new stakeholders in this field.

### Stakeholders

The Forum will bring together a broad range of stakeholders and partners including

- policy-makers at the Vietnam national levels
- practitioners and academics
- representatives from civil society and business

All participants are guided by the common objective of promoting the transformation of education and training to provide learners with a high-

## 5. SUMARE Forum

<https://marehcm.biendaohcm.com/?p=7923>

SUMARE Forum- **Sustainable Management of Marine Resources and Environment** was established by the HCMUNRE with the aim of creating an academic environment among scientists, businesses, and institutions/ organizations and unions interested in the sustainable development of natural resources and the environment in the seas and plains of Southeast Asia.

This is one of the series of activities of the MARE project.

To promote academic collaboration among stakeholders on MARE topics, the SUMARE forum was established and held on a non-regular basis. The form of organization can be in offline or online modes.

The SUMARE Platform is a global registry of voluntary commitments and multi-stakeholder partnerships made by stakeholders in support of the implementation of the **SUMARE** in general and for MARE project in specific.

The poster is for a forum titled "DIỄN ĐÀN SUMARE" (SUMARE Forum). It is co-funded by the Erasmus+ Programme of the European Union and the MARE project. The main theme is "Quản lý bền vững tài nguyên và môi trường biển" (Sustainable Management of Marine Resources and Environment). The specific topic of the report is "Báo cáo chuyên đề: Quản lý Tài nguyên nước vùng ĐBSCL trong bối cảnh biến đổi khí hậu" (Specialized Report: Water Resource Management in the Mekong Delta Region in the context of climate change). The report is by PGS. TS. Lê Anh Tuấn, a professor at Cần Thơ University. The poster includes logos for the European Union, the University of Natural Resources and Environment, and the MARE project. It also features a circular portrait of the author, PGS. TS. Lê Anh Tuấn. The text is in both Vietnamese and English. A URL is provided for the report: [https://marehcm.biendaohcm.com/?page\\_id=7421](https://marehcm.biendaohcm.com/?page_id=7421). The location and date of the forum are listed as Ho Chi Minh City, 09 June 2022.
