### Report

Date: 28.08.2023

Report Prepared by: Veljo Kabin, educational technologist at the Estonian University of Life Sciences

The e-learning sessions took place on August 9 and 10 in the computer lab of Technology Building of Estonian University of Life Sciences. In total, **there were 8 academic hours split across 4 sessions:**

- E-learning session I: "How to create quizzes in Moodle"
- E-learning session II: "Possibilities of using the assignment tool in the Moodle courses"
- E-learning session III: "H5P – How to create interactive videos, quizzes and presentations"
- E-learning session IV: "Various digital tools that can be used in teaching"

The training was conducted in English.

**The purpose of the training** was to introduce, through practical tasks, some of the most used e-learning environments and tools that Estonian University of Life Sciences uses in its teaching. The participants had to create and set up a quiz for the Moodle course, which consists of the 4 most common question types and create and set up an assignment tool for the Moodle course, where students download a file uploaded by the lecturer, complete it, and submit the completed file into the assignment tool. The participants also had the opportunity to explore the possibilities of H5P and to practically try out two content types. In the last session, I introduced various digital tools that can be used in the implementation of teaching.

## Marine Coastal and Delta Sustainability for Southeast Asia

### Learning outcomes:

- The participant is able to create and set up a quiz in Moodle using the most common question types.
- The participant is familiar with the options of the assignment tool in Moodle and can configure assignments.
- The participant knows what H5P is and how to create interactive content there.

### Feedback:

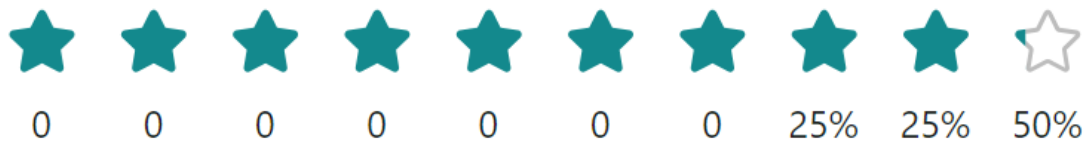

1. How did the E-learning sessions compare to your expectations?

# 8.5

2. How satisfied were you with the computer lab and its possibilities?

# 9.2

### 3. Please rate each E-learning session.

■ Poor  
 ■ Below Average  
 ■ Average  
 ■ Above Average  
 ■ Excellent

4. Any comments on the contents of the learning sessions (lectures, practical training) in terms of quality of the contents, as well as lecturer and his preparedness?

- It was a brilliant session where I gain a lot of new information.
- Handouts given on or before the training day would be useful.
- The training was made to tailor for early start educator so it's kinda average for me. New knowledge are acquired but I was expecting the training will be more advanced since all participants are experienced teachers

5. What is one useful piece of knowledge or tool that you have gained from these sessions? What are you going to use yourself?

- chat gpt and other free stuff for creating video
- H5P is one mind blowing tools.
- H5P was very nice and new for me. I will adopt it in my next teaching at my university.
- Lumi education video editing for h5p. Yes I will use it

6. Any constructive criticism, expressions of gratitude, or recommendations that could contribute to the enhancement of future training sessions?

Page | 6

- Everything was fantastic. Probably if given one more day to play around with the new tools will be great. However, the session was fantastic. Thank you for sharing.
- The instructor was good and knowledgeable.
- If the trainer provides guidebook for participants, it will be better too
