

2nd May 2021: Industry in Classroom_Awareness on Marine and Coastal Pollution

The talk was attended by 53 undergraduate students. It covered topics on various type of pollutants such as sewage, plastics, E-waste, etc., in our environment. The talk focused on marine debris and plastic pollution and how we as an individual could do to reduce the marine debris. The students also exposed to the decomposition timeline of various type of marine debris in the environment. After the talk, students were given a group assignment in *jamboard* to present *I'am not plastic project*.

In this talk, the awareness and knowledge of marine and coastal pollution for environmental sustainability among students has been improved. Several videos were shown on how people love and care for the environment, and students were inspired by their actions. Students also learned how to reduce plastics pollution in the environment and proposed ways to improve school children understanding and awareness on coastal pollution.

MMS3003: Environment – Issue and Global Perspective

Co-funded by the
Erasmus+ Programme
of the European Union

The poster is divided into two main vertical sections. The left section has a green background and contains the following text: 'Industry in Classroom' in white, 'Awareness on Marine and Coastal Pollution for Environmental Sustainability' in white, 'by, Dr. Corrienna Abdul Talib' in white, 'Universiti Teknologi Malaysia (UTM)' in white, 'ENVIRONMENT – ISSUE AND GLOBAL PERSPECTIVE' in white, and '2nd MAY 2021 | SUNDAY | 4:00PM' in white. The right section is split into two colored blocks: an orange block with a white circular pattern at the top, and a solid pink block at the bottom.
